Intake Spec v1.2 — What Doesn't Match

Our prototype compared with the Intake Form Specification v1.2 (Oct 2026). Internal. 27 Oct 2026.
"Mismatch" means we built it, but it isn't what the spec asks for. Time is in work days. The fixes made so far are not saved to git yet.

Total mismatches	✅ Fixed	❌ Still open	Time left
11	**4**	**7**	**About 1.5 days**

The mismatches

#	What	The spec wants	What we had	Status	Time
1	Gender choices	Woman, Man, Non-binary, Agender, Not listed (type your own), Prefer not to say	Male, Female, Trans woman, Trans man, Intersex, Non-binary, Other	✅ **Fixed. Old answers are moved to the new choices.**	—
2	Sex at birth	Add "Prefer not to say"	That choice was missing	✅ **Fixed**	—
3	Pronoun question	"What pronouns should I use for you?" and "Write in"	"What are your preferred pronouns?" and "Other"	✅ **Fixed**	—
4	Which questions show up	Decided by the person's body (their organs, sex at birth and hormone stage), never by gender alone	Some questions could never appear because of broken rules	✅ **Fixed. Questions now follow the body.**	—
5	Hormone therapy (HRT) details	7 HRT types, plus: how it's taken, for how long, did it help, why they stopped	4 types and no follow-up questions	🟡 **Half done. The 7 types are in; the 4 follow-up questions are not.**	Half a day
6	"Who are you asking about today?"	Asked at the start of every new chat (me, my child, my older parent, my partner)	Set once on the profile, not asked each chat	❌ **Open. Planned for step 2.**	Part of step 2
7	Password rule	At least 8 characters, 1 capital letter, 1 number	Only checks for 8 characters	❌ **Open**	1 hour
8	Sign-up questions	"How did you hear about us?" and "Already a Genesis Gold customer?"	Neither question is asked	❌ **Open**	2 hours
9	Teen questions	No questions about sex, birth control or fertility; no adult-only options	Teens see adult options like "Pregnant" and "Post-menopausal"	❌ **Open**	2 hours
10	Intersex question for teens	Simpler wording, plus "I'm not sure" and "I don't understand the question"	Same wording as for adults	❌ **Open**	2 hours
11	Hours of sleep	A required question in the health profile	Only asked during the chat	❌ **Open. Needs a decision first.**	2 hours

Small leftovers from fix #1 (not counted above)

What	Where	Effect
Our internal auto-test tool still looks for the old gender buttons	Prototype tools (persona runner)	Its test runs stop at the gender question. Internal only.
The "Complete your profile" gender question still shows the old choices	Complete-your-profile screen	The two gender questions don't match
Demo lists still show the old choices	Design-system and widget demo pages	Demo pages only

Suggested order

Order	Fix	Why	Time
1	#9 and #10 (teen questions)	Teens shouldn't see adult questions	Half a day
2	#7 and #8 (sign-up)	Quick and easy	3 hours
3	#5 (HRT follow-ups)	Finishes a half-done item	Half a day
4	#11 (sleep hours)	Needs a team decision first	2 hours
5	#6 ("Who are you asking about?")	Part of the bigger step 2 work	Step 2
